

CORRESPONDENCE/MEMORANDUM

---

DATE: April 8, 2014

TO: Door County Highway Salt Storage Facility Case File  
(BRRTS # 02-15-554088)

FROM: Kristin DuFresne – NER RR Program

SUBJECT: Summary of April 8, 2014 Phone Conversation

PARTICIPANTS: John Kolodziej – Door County Highway Commissioner  
Kristin DuFresne – DNR

DuFresne called Kolodziej to discuss recent correspondence.

DuFresne thanked Kolodziej for the recent status updates and for clarifying that drinking water wells (rather than monitoring wells) are being used investigate the sodium and chloride release.

DuFresne asked Kolodziej to hold off on well abandonment and well installation activities. DuFresne would like the opportunity to talk with the DNR Drinking Water and Groundwater (DW&GW) Program to see if there will be any special well construction requirements. Kolodziej stated he could wait a bit as he needed approval from the Door County Corporation Counsel (DCCC). After obtaining approval from the DCCC the respective property owners will need to be contacted.

Kolodziej stated he obtained quotes for the replacement wells. The replacement wells are anticipated to be 6" – 8" wells with 170 feet of casing and a total depth of 240 feet.

DuFresne asked if Kolodziej had documentation regarding the soil excavation that took place near Test Pit 8. Kolodziej stated samples were collected and bedrock was not encountered. DuFresne asked Kolodziej to provide the Department with a report documenting the soil excavation activities. Kolodziej stated he would look at his records and provide the Department with documentation.

DuFresne asked if soil excavation activities took place in the area of Test Pit 12. Kolodziej stated he would need to go back and look at his records.

The new salt storage facility has been constructed. Kolodziej was asked to provide the Department with a site map depicting current site conditions.

Kolodziej will review his records to refresh his memory regarding the site specifics. DuFresne will discuss the proposed replacement wells with the DW&GW Program. DuFresne stated Janelle Merry, DNR DW&GW, may be contacting Kolodziej to discuss well construction requirements.
